Silence is golden

Discretion is paramount when using public

toilets. Excess noise is frowned upon.

Even something as prosaic as the sound

of a hand dryer can attract unwanted

attention and even more so in executive

washrooms. The alternative of paper

towel is messy, expensive and often

Applause Satin Stainless Steel A APP02/SSS

inconvenient when dispensers run dry.

The best solution would be a purpose

built hand drying unit that is much

quieter but as effective as the heavier

commercial units. The Australian

designed and manufactured Applause

range of hand dryers fits the bill and

does so elegantly. JD MacDonald has

managed to incorporate the power of

heavier commercial hand drying units

into a low profile, whisper quiet unit.

The discreet styling and small footprint of

the Applause is a unique combination

rarely found in hand dryers and makes

it ideal for smaller executive washrooms.

The styling of the Applause unit, like all

Applause Polished Stainless Steel A APP02/PSS

good industrial design, is borne of

function. Washrooms and especially

small ones need constant cleaning.

A less streamlined form can collect dust

and grime that accumulates over time

and can make even the best designed

washrooms look tired.

The form of the Applause hand dryer

allows for ease of cleaning and is devoid

of areas that trap dust and grime.

STAINLESS STEEL

The Australian designed and manufactured

Applause range now features satin or

gloss finished high-grade stainless steel.

The satin and gloss finished stainless steel

(hard to show in photography) are equally

as hard wearing but add more flexibility

to the designers palette, allowing more

latitude for individual expression.

Applause Automatic A APP02

The choice of high quality stainless

steel finishes in part of the range

also reduces the chance of scratching

associated with regular use of

abrasive commercial cleaners.

CLASSIC WHITE

The range is available in a classic

white powdercoated finish in

automatic operation.

Simple installation also makes the

unit perfect for retro-fitting of existing

washrooms. And this simple and

practical design has another benefit;

good industrial design is timeless.

And timeless design is a desirable quality

when it comes to commercial fit-out.

And last but not least, in the unlikely

event of a breakdown Applause hand

drying units are easily maintained with

ready access to replacement parts.

The Applause range of units is also

incredible value for money, with all the

reliability of Australia's most

recognised brand of hand dryers.
